

Learn how to connect your personal device to Wi-Fi provided by your property or office management.

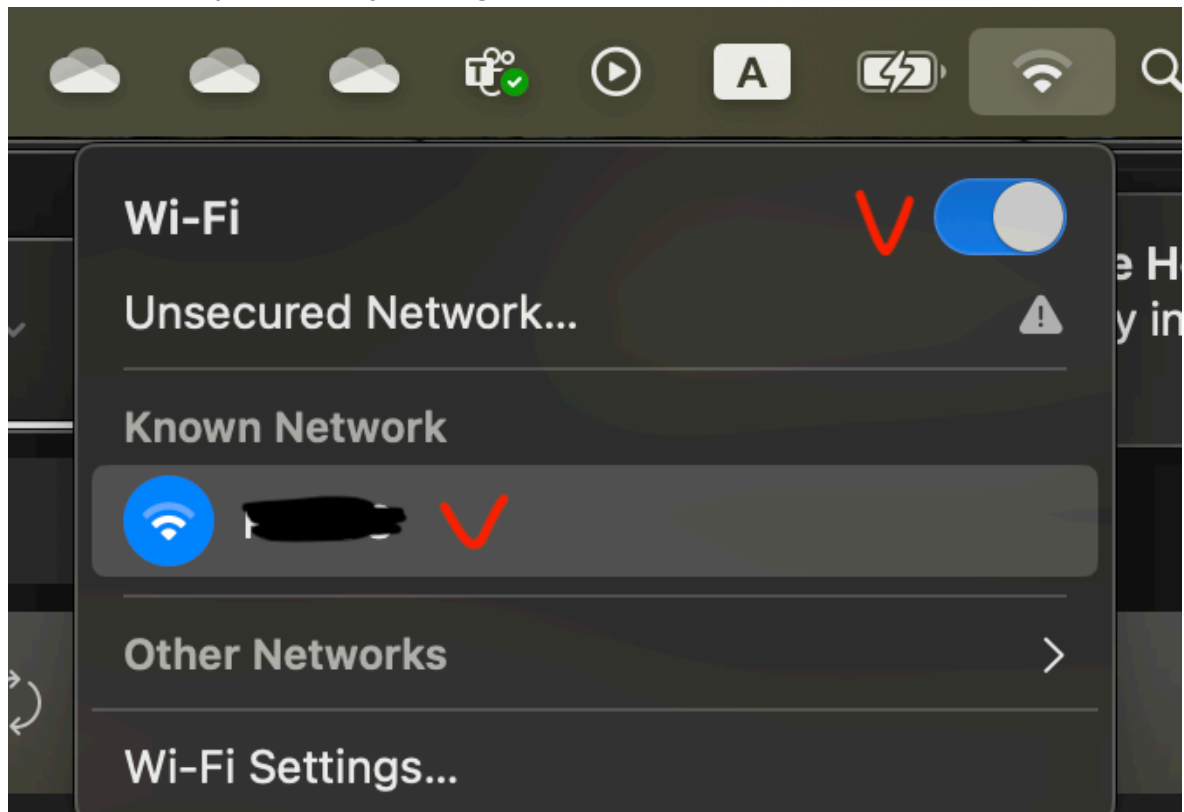

## Prerequisites

Before connecting a personal device to Wi-Fi, contact the property or office manager to obtain:

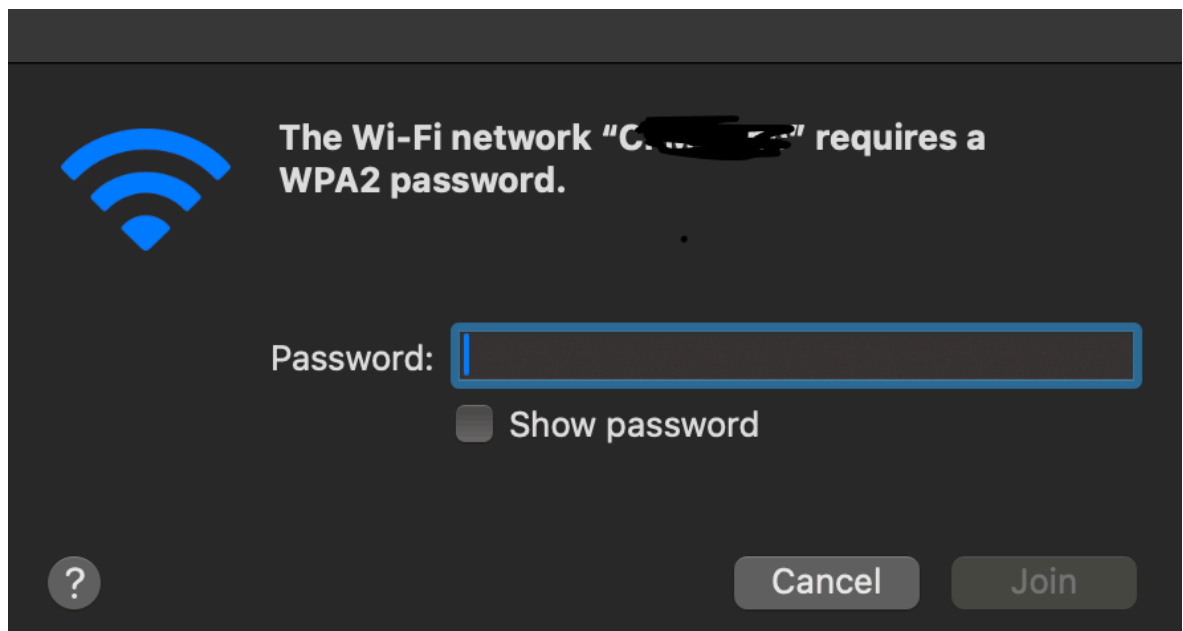

- The correct Wi-Fi network name (SSID)
- The Wi-Fi password

## Connecting to Wi-Fi

1. Open your device's network settings.
2. Ensure Wi-Fi is turned on.
3. Find the SSID provided by management and select it.

4. Enter the provided password.

## Additional Notes

- Depending on the network configuration (e.g., "Guest Wi-Fi mode"), you may not be able to see other devices on the network.
- If you need to reset your password or experience connection issues, contact the office or IT management.
